CB-SERIES BUOY RADAR REFLECTOR

INSTALLATION INSTRUCTIONS

Note: Install the radar reflector and other top-side mounts before installing the solar tower on the buoy.

Installation on NexSens Solar Tower

1

Locate the (4) threaded inserts on top of the CB-Series solar tower outlined by the red rectangles in the schematic below.

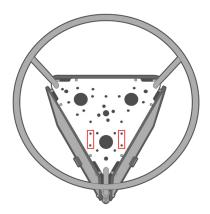

Figure 2: Radar reflector mounting points on the CB-Series solar tower.

2

Align the (4) holes at the base of the radar reflector with the mounting points.

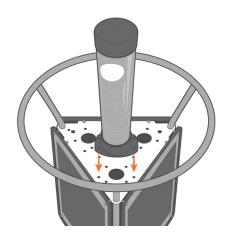

Figure 3: Radar reflector mounting alignment.

Figure 1: CB-Series Buoy Radar Reflector

Overview

The CB-Series buoy radar reflector is designed to reflect radar waves, making NexSens data buoys clearly visible on radar screens.

What's Included

Radar mounting hardware

- (4) 1/4" Split lock washers
- (4) 1/4" Flat washers
- (4) 1/4-20 x 3/4" Hex head cap bolts

Place a bolt with a lock washer and flat washer into each mounting point.

a. Tighten down the bolts with a 7/16" socket wrench.
