

WQData Live– Getting Started

Create WQData LIVE Account

WQData Live allows users to view and process data from monitoring systems.

Navigate to the [Create Account](#) page and fill out all pertinent information

Note: If desired, perform a **Device Quick Setup** by entering a product claim code. Doing this automatically creates a new project and site with the device to allow for quick data access.

For more information on typical settings and configurations go to:
<http://v2.wqdatalive.com/knowledge-base/typical-project-setup/>

WQData Live– Getting Started

Customizing a project

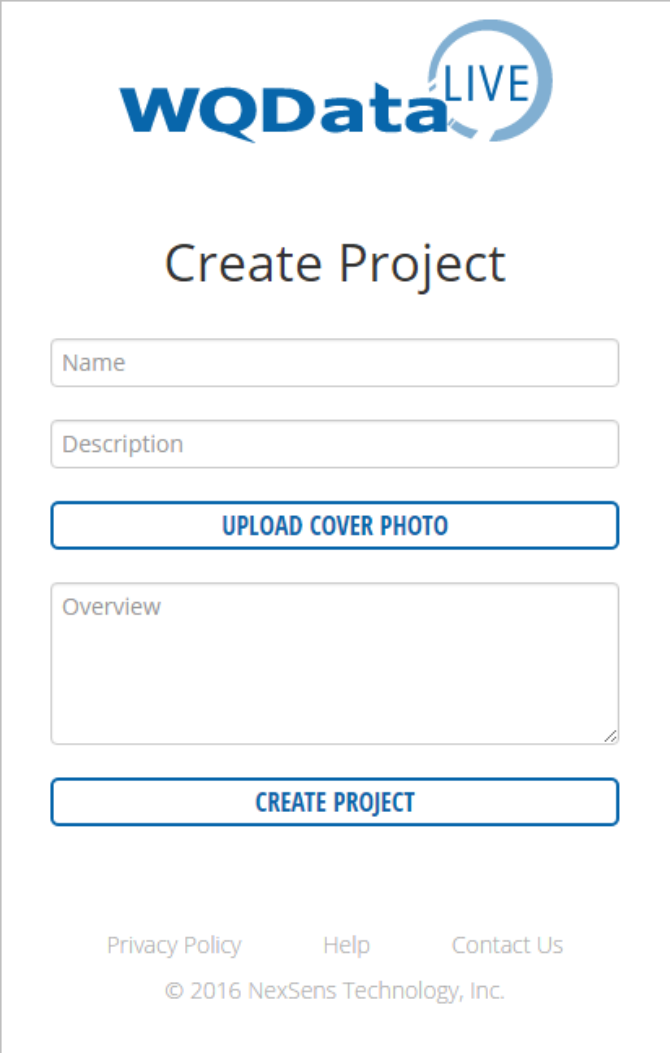

Name: The project's name

Description (optional): A one-liner that encompasses the entire project

Project Image (optional): Upload a picture to represent the project

Overview (optional): A detailed description of the project

Note: If nothing is entered here, a default block of text about WQData LIVE will be included

The screenshot shows the 'Create Project' interface for WQData LIVE. At the top is the WQData LIVE logo. Below it is the title 'Create Project'. The form consists of several input fields and buttons:

- A text input field labeled 'Name'.
- A text input field labeled 'Description'.
- A blue button labeled 'UPLOAD COVER PHOTO'.
- A larger text area labeled 'Overview'.
- A blue button labeled 'CREATE PROJECT'.

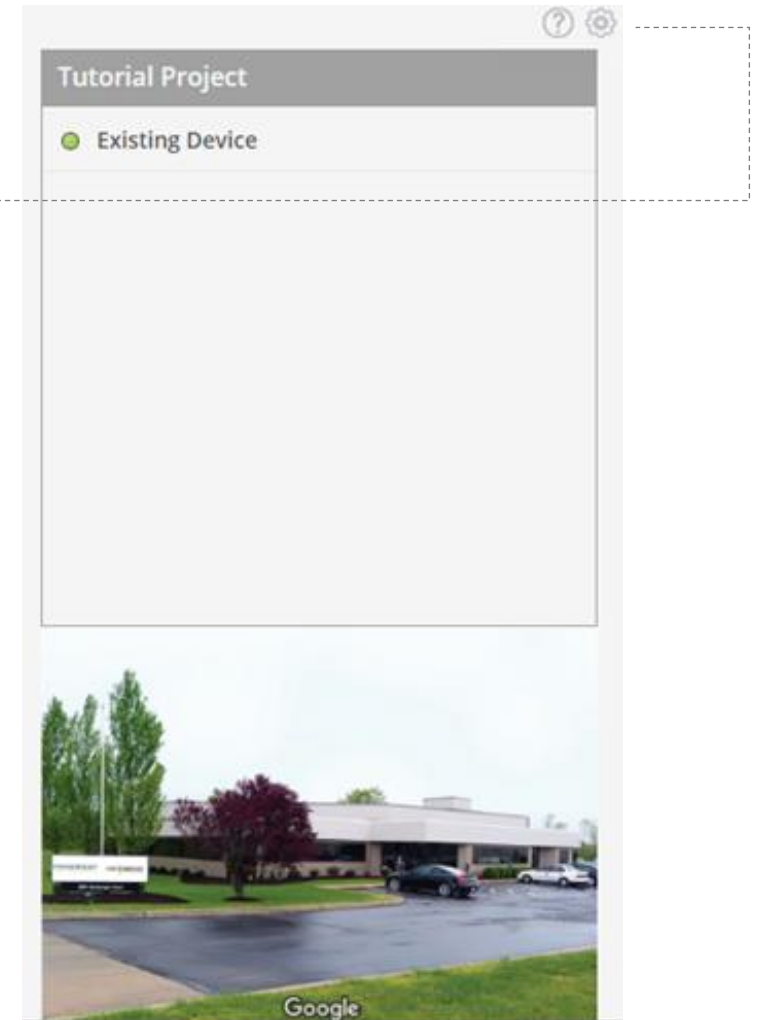

At the bottom of the form, there are three links: 'Privacy Policy', 'Help', and 'Contact Us', followed by the copyright notice '© 2016 NexSens Technology, Inc.'.

Setting site name and location

Give the site a name

Enter the location by either clicking on the map and clicking on a location or by entering the latitude and longitude.

The *Use device GPS* option will continually update the map location based on an attached GPS sensor if this is available for the device type

*Use the slider to choose a default zoom level

Use device GPS

WQData Live– Getting Started

Assigning devices to the site

Enter a “Claim Code” (found on product quick start or box) into the dialog and click **ADD NEW**

The device will now appear in the Assigned Devices list and can subsequently be removed from the site by clicking the arrow to move it back to the Unassigned Devices list

Repeat to add multiple sites or devices

Click **SAVE**

For more information on typical settings and configurations go to:
<http://v2.wqdatalive.com/knowledge-base/typical-project-setup/>

The screenshot shows the 'Project and Site Settings' dialog box. It contains the following elements:

- Two input fields for coordinates: 39.782466549973 and -83.994129002094.
- A checkbox labeled 'Use device GPS'.
- A horizontal slider with minus and plus buttons.
- Two lists: 'Assigned Devices' and 'Unassigned Devices', each with a vertical scrollbar.
- Two arrows (left and right) between the lists for moving devices.
- An input field containing the claim code 'B954D6D7' and an 'ADD NEW' button.
- A 'Delete Site' link in red text.
- A 'CREATE' button at the bottom left.
- 'SAVE' and 'CANCEL' buttons at the bottom right.
